Description of Hazardous Waste

1. Waste Type: Waste Lithium Metal (D001, D003)
EPA Number: Not Required
DOT Hazard Class: 4.3

Shipments:	2/1/2011	600 lbs
	6/7/2011	849 lbs
	9/12/2011	463 lbs
	<u>11/7/2011</u>	<u>370 lbs</u>
Total Amount Shipped		2,282 lbs

Efforts to reduce volume and toxicity of waste:

The lithium waste stream was reduced by 62% (by weight) in 2011 by continued implementation of an initiative kicked off in 2010 in which waste lithium is vacuum packed, rather than packed in mineral oil. Ongoing efforts by Manufacturing and Production staff continue to yield good results with respect to reduction of scrap battery generation.

Changes in volume and toxicity for wastes achieved during year:

Use of the vacuum packing process reduced the waste lithium in mineral oil waste stream by approximately 5,000 pounds in 2011.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.
